

# Call for Workshops SDS2025

IEEE Swiss Conference on Data Science

Be part of the 12th IEEE Swiss Conference on Data Science (SDS2025), Switzerland's premier event for applied Data Science!

We invite the Data Science community to propose thematic workshops or hands-on tutorials. Topics may include, but are not limited to, the following key focus areas for SDS2025:

- Large Language and Foundation Models
- Human-AI Interaction
- AI and Data Analytics for Science
- AI and Society

Workshop topics should have a high relevance to important sub-fields of Data Science, present tangible outcomes, and include hands-on activities.

All workshops will take place on Thursday, **June 26, 2025**.

**Important:** Workshop organizers are responsible for arranging the venue and coffee breaks. In return, organizers will receive 50% of the revenue generated per participant attending their workshop.

Last year we welcomed **600+ participants** from the Data Science field.

**Take a look at SDS2024**  
[Flashback Video](#)

The 12th IEEE Swiss Conference on Data Science (SDS2025) brings together researchers, developers, innovators, and decision-makers with expertise in Data Science.

The **goal of SDS2025** is to foster the exchange of knowledge and innovative ideas in Data Science through a network of data scientists, leaders and engineers from research and industry.

Following the motto:  
*together we move faster.*
